

Did you know just one blistering sunburn could double your child's risk of getting the most dangerous kind of skin cancer? UV damage begins with a child's first exposure to the sun. And it adds up year after year. So play it safe with the sun. Don't plan to tan.

-  Use a broad-spectrum sunscreen with an SPF of 15 or higher.
-  Cover up with a wide-brimmed hat, UV protective clothing and sunglasses.
-  Use extra caution during the peak sunlight hours between 10:00 a.m. and 3:00 p.m.

Visit [www.waterparks.com](http://www.waterparks.com) for more tips on playing it safe this summer.
